

## **COFFEE BREWING**

### **Brewing Instructions and Recommendations**

### **SPECIALTY COFFEE ASSOCIATION OF AMERICA (SCAA)**

#### **AUTO DRIP MACHINES**

2 tablespoons whole bean (.38oz) to every 6 ounces of water  
Water temperature to the range of 195 -200 degrees  
12-cup machine brews 12-8 ounce "cups"

#### **FRENCH PRESS**

2 tablespoons whole bean (.38oz) to every 6 ounces of water

### **BUCKHORN RECOMMENDATIONS**

We recommend roughly 1/2 the SCAA recommendation:

Example: 8 tablespoons whole bean for a 12-cup auto drip machine

Example: 5 tablespoons whole bean for a 32-ounce French press machine

Formula for recommendation:

Cups multiplied by 8 divided by 6 = tablespoons whole bean
